

40 FRIENDS?

I CAN HAVE 40 REAL FRIENDS TO HOOK UP WITH?

Are you a high school, community college, college, or grad school student, and want a better way to find other students, who are up to doing things socially, and studying for school work at any time, when you are? Now we have a digital social academic Club where you can access Chat and real meetup groups to do things with friends during the week or on the weekends for FREE! People get up on the site and ask to see if anyone else is up for that activity from a list, and can meet group-with-group. Don't text alone anymore! Go out, meet people like you, and do activities! No more are you trapped alone in a room with no one to talk with, chat with, or go do things with! Here is how you can "become famous"-

- Saturday pizza group x 5 people from my school - talk and eat together
- Thursday soccer group x 8+8 people from two schools - play team sports
- Tuesday video games group x 5 people from my school - rock out at home
- Sunday sports group for exercise x 4x4x4 people from 3 schools work out
- Monday - Friday after class study group x 8 people - two groups study
- Friday night dating group x 4+4 people from two schools
- == That's 54 friends you can have, and spend time with, meeting in one week and weekend, spread around two plus schools, with the software from the site!

And since you meet in groups, you never have to meet people uncomfortably alone!

Do You feel "famous" yet? Now you can have a social life, and do well in school, with that support taking you into your future.

The Social-Academic Networking Club.

Pass out copies of this flier to people at your school from a link on the site, and have them pass out copies too to friends they know! Populate the site! It's FREE social opportunity! Go to www.explainlearning.com and then go to your favorite Social Media sites with all your new friends!
